● Keep the adaptor and power cord dry and protect from humidity.

● When this machine is not using for a long time, please remove the connection of power adaptor.

FEATURES

- Non-pc stand-alone security digital video recorder with embedded operation system
- H.264 compression format
- Mobile monitoring
- Multi languages supported
- Support NTSC/PAL video system
- 4/8CH video inputs, 1CH monitor output, 1CH audio input, 1CH audio output
- VGA output: 800×600, 1024×768, 1280×1024
- High quality image, brightness, contrast, sharpness and color adjustable for each channel
- Support auto sequence display
- Display modes: PIP, FULL, QUAD, 9 SPLIT(for 8CH DVR)
- Recording modes: always recording, manual recoding, schedule recording and motion recording
- Image quality and bitrate: highest, high, standard, low
- Detailed event log support
- Searching modes: time / date searching, event searching, urgent searching
- Support fast forward and rewind: ×2, ×4, ×6
- Backup modes: network backup, USB backup
- Support RS-485 PTZ control(speed dome camera), and preset positions operation
- Support USB mouse and infrared remote controller operation
- Support 1 SATA port HDD
- Support TCP/IP, DHCP and PPPOE
- IE browser monitoring
- Network viewer tool for monitoring, playback, setup, upgrade and log viewing
- Support email, UPNP, NTP, DNS and DDNS, supply a free DDNS for DVR
- Triplex function: simultaneous recording, playback, network viewing
- Telemetry network control: live view, playback, recording and parameter setting
- Support zoom function for both live and playback mode.
- Support live and playback video hide.
- Support video covered.
- Support administrator and normal user management.
- Frame rate in the live display mode：4CH: 120fps(NTSC), 100fps(PAL). 8CH: 240fps(NTSC), 200fps(PAL).
- Frame rate in the recode mode:
  4CH:
  > CIF: 120fps(NTSC), 100fps(PAL)
  > 1/2D1: 120fps(NTSC), 100fps(PAL)
  > D1: 60fps(NTSC), 50fps(PAL)
  8CH:
  > CIF: 240fps(NTSC), 200fps(PAL)

Ⅵ SPECIFICATION

Ⅰ INSTALLATION

1.1 Packing Detail

1. User's manual   1
2. DC12V/2A power adaptor   1
3. Screws   1 set
4. Infrared remote controller   1 (Optional)
5. USB port mouse   1
4. CD with mobile software and net viewer software   1

1.2 Front Panel Controls

1. "MENU" button

During the live display mode, press this button to display MAIN MENU and enter main setup menu, press "CANCEL" button to exit the main setup menu. After setting parameters in the menu, press "MENU" button to save and exit menu.

In PTZ operation mode and CAMERA COLOR menu, press this button to make the PTZ menu and CAMERA COLOR menu transparent.

2. "CANCEL" button

In the setup menu or PTZ operation mode, press this button to exit the menu or PTZ operation mode.

3. "SEARCH" button

During the live display mode, press this button to enter SEARCH menu. Then press "LEFT" or "RIGHT" button to select the playback modes (TIME SEARCH, EVENT SEARCH and URGENT SEARCH) and playback date/time. Press "ENTER" button to begin playback. Press "CANCEL" button to stop playback. In the playback mode, press this button to turn on or off the playback audio. In SCHEDULE setup mode, press this button to select different recording mode.

4. "↵ "/ "ENTER" button

During the live display mode, press this button to display the popup menu. In the setup menu, press this button to enter the next operation. In PTZ operation mode, press this button to enter PTZ operation.

In the playback mode, press this button to enter different playback control mode.

During the power off status by popup menu, press this button to power on the

DVR again.

5. "▲"/"UP" button

Press this button to move the cursor up to the next line in the setup menu.

In PTZ operation mode, press this button to move the cursor up to select function.

In the playback mode, Repeat pressing this button to select the different display mode.

6. "▼"/"DOWN" button

Press this button to move the cursor down to the next line in the setup menu.

In PTZ operation mode, press this button to move the cursor down to select function.

In the playback mode, Repeat pressing this button to select the different display mode.

7. "◄"/"LEFT" button

During the live display mode, Repeat pressing this button to select the different display mode.

Press this button to move the cursor in left direction in the setup menu.

In PTZ operation mode, press this button to move the cursor left to select function.

In the playback mode, press this button to select different playback control mode (PLAY/PAUSE, BACKWARD, FAST FORWARD, STEP FORWORD).

8. "►"/"RIGHT" button

Press this button to move the cursor in right direction in the setup menu.

In PTZ operation mode, press this button to move the cursor right to select function.

In the playback mode, press this button to select different playback control mode (PLAY/PAUSE, BACKWARD, FAST FORWARD, STEP FORWORD).

9. Power indicator

Indicate running state of system. It's on when system power on.

10. HDD status indicator

Flicker when HDD is working.

11. USB Mouse port

Connector for the USB mouse.

12. USB port

Connection of the USB interface device for upgrading firmware and backup recorded files.

13. Remote sensor

Input sensor for the remote controller.

1.3 Rear Panel Connectors

1. **CAMERA IN (CH1~CH8)**
2. **LIVE MONITOR OUT**
3. **AUDIO IN/OUT**
4. **VGA OUT**
5. **RJ-45 ETHERNET**
6. **RS-485 PTZ**
8. **DV12V POWER IN**
9. **POWER SWITCH**
10. **GROUND**

1.4 Remote Controller
4CH   **8CH**

1. **NUMER BUTTON: Press the desired camera number button you wish to display on the monitor.**
2. **◄◄: Repeat pressing this button to speed-up playback backward at the speed**

of X2, X4 or X6 during the playback.

3. ▶∣∣ : Press this button to display a still picture during the playback, press this button again to restart play.

4. ▶▶: Repeat pressing this button to speed-up playback forward at the speed of X2, X4 or X6 during the playback.

5. ■ : Press this button to stop the playback during the playback.

6. MENU: Display the setup menu during the live display mode. In PTZ operation mode and CAMERA COLOR menu, press this button to make PTZ menu and CAMERA COLOR menu transparent.

7. ESC: In the setup menu or PTZ operation mode, press this button to exit the menu or PTZ operation mode.

8. REC: Begin and stop manual recording.

9. PTZ: Enter PTZ operation mode and display PTZ menu.

10. MUTE: Turn audio on/off during the live display mode or playback mode.

11. PLAY: Enter the playback mode and display the search menu.

12. MODE : Select the different screen display (FULL CHANNEL, PIP, QUAD, 9 SPLIT) during the live display mode or playback mode.

15. ↵ : During the live display mode, press this button to display the popup menu. In the setup menu, press this button to enter the next operation. In PTZ operation mode, press this button to enter PTZ operation. In the playback mode, press this button to enter different playback control mode.

16. ▶: Press this button to move the cursor in right direction in the setup menu. In PTZ operation mode, press this button to move the cursor right to select function. In the playback mode, press this button to select different playback control mode (PLAY/PAUSE, BACKWARD, FAST FORWARD, STEP FORWORD).

17. ▼: Press this button to move the cursor down to the next line in the setup menu. In PTZ operation mode, press this button to move the cursor down to select function. In the playback mode, Repeat pressing this button to select the different display mode.

1.5   Installation Process

1. Remove the power cord of DVR adaptor.
2. Remove the screws of the cover and open the top cover of the DVR. Screw and

take out the HDD bracket and mount HDD to the bracket with the screws. Mount the bracket with HDD to DVR with the screws. Connect power cord and SATA cable between HDD and DVR main board. Then mount the top cover of DVR with the screws.

3. Connect BNC for CAMERA IN port, MONITOR OUT port and JACK for AUDIO IN, AUDIO OUT port from the relevant equipments.

4. Connect the power cord of adaptor.

Ⅱ OPERATION

▨ : This icon on the bottom status bar is called the MENU icon in this manual.

◁┘ : This button in the menu is called the SET button in this manual.

✕ : This button in the menu is called the CANCEL button in this manual.

⊡ : This button in the menu is called the OK button in this manual.

2.1   Power On

1. After installation correctly, connect power adaptor to switch the power of DVR on.

2. The HDD must be formatted by DVR when using the HDD first time.

2.2   Power Off

1. Enter the popup menu and select QUIT to power off the DVR. During this time, press ENTER button on the front panel to power on DVR again.

Note: If the DVR power off abnormally during recording, playback or system setup, it will take longer time to power on.

2. If the DVR is not in use for a long time, please remove the connection of the power cord of adaptor.

2.3   Display Mode

1. Press "◀"/"LEFT" and "▶"/"RIGHT" button or remote controller "MODE" button to select the different screen display (FULL CHANNEL, PIP, QUAD, 9 SPLIT) during the live display mode. Press NUMBER button or "▲"/"UP" and "▼"/"DOWN" button to select single camera and the single live view is displaying on the screen.

● Mouse

Click the mouse on the MENU icon on the bottom status bar to display POPUP MENU during the live display mode, click on the LIVE button and select the different screen display mode.

In the live QUAD or SPLIT display mode, double click the image of a channel to display the single channel. Double click the image again to display QUAD or SPLIT image.

2. To zoom in images can only be operated by mouse.

● Mouse

Select the desired single camera and the single live view is displaying on the screen. Click the mouse on the MENU icon on the bottom status bar to display POPUP MENU during the live display mode, click on the "Zoom" button to enable ZOOM function. Keep pressing the left mouse button and drag it to select zoom area. After release the left mouse button it will zoom in the selected image. Right click the mouse to return back the normal image. Double click the mouse to exit ZOOM function.

2.4 Manual Recording

1. Select the channel RECORD MODE to OFF at the RECORD setup menu.

2. Press the "ENTER" button on the front panel to display POPUP MENU during the live display mode, select the EMG RECORD button or press remote controller "REC" button to begin manual recording. The red recording icon will be displayed on the bottom status bar. The letter E will be displayed on each channel.

3. If the hard disk is full during recording, the system may stop recording when setting HDD OVERWRITE to OFF at the SYSTEM INFO setup menu. The system may not stop recording and automatically overwrite the oldest recorded file when setting HDD OVERWRITE to ON at the SYSTEM INFO menu.

4. Press the "ENTER" button on the front panel to display POPUP MENU during the live display mode, select the EMG RECORD button or press remote controller "REC" button again to stop manual recording.

2.5 Motion Alarm Recording

1. Stop manual recording.

2. Select the channel RECORD MODE to MOTION at the RECORD setup menu. Correctly select motion setting at the MOTION setup menu.

4. When motion detected (the letter M will be displayed on the channel), the DVR will begin ALARM recording and the letter R will be displayed on the channel. If alarm signal cannot be detected, it will keep ALARM recording for the duration set in the MOTION setup menu and then stop ALARM recording automatically.

5. Select the channel RECORD MODE to OFF at the RECORD setup menu to disable ALARM recording.

2.6 Schedule Recording

1. Stop manual recording.

2. Select the channel RECORD MODE to SCHEDULE at the RECORD setup menu. There are totally 5 schedule recording lists to select.

3. Correctly set the schedule recording date, time and type for a schedule recording list at the SCHEDULE setup menu.

4. The system begins or stops schedule recording automatically according to the SCHEDULE setup.

5. Select the channel RECORD MODE to OFF at the RECORD setup menu to disable SCHEDULE recording.

2.7 Playback

1. Press "SEARCH" button on the front panel to display SEARCH MENU during the live display mode. Then press "LEFT" or "RIGHT" button to select the playback modes

(TIME SEARCH, EVENT SEARCH or URGENT SEARCH) and playback date/time. Press "ENTER" button to begin playback.
       2. During the playback mode, press "LEFT" or "RIGHT" button to select "PLAY/PAUSE" mode and "▶" button on the playback status bar is selected. Press "ENTER" button to pause the images. Press "ENTER" button again to restart playback.

       3. Press "LEFT" or "RIGHT" button to select "BACKWARD/FORWARD" mode and "◀◀" button or "▶▶" button on the playback status bar are selected. Press "ENTER" button to speed-up playback backward or forward at the speed of 2x, 4x or 6x.

       4. Press "RIGHT" button to select "STEP FORWARD" mode and "▶|" button on the playback status bar are selected. Press "ENTER" button to enter step forward playback.

       5. Press "UP" button or "DOWN" button to select the different display mode or select a single camera displaying on the screen.

       6. Switch to one channel display, press "SEARCH" button on the front panel to enter playback audio volume setting mode. Press "LEFT" or "RIGHT" button to decrease

or increase the playback audio volume. Press "CANCEL" button to exit playback audio volume setting mode.

7. Press "CANCEL" button to stop playback and return to previous mode.

● **Mouse**

Click the mouse on the MENU icon on the bottom status bar to display POPUP MENU during the live display mode. Click on the SEARCH button to display SEARCH MENU. Then click on the "TIME SEARCH", "EVENT SEARCH" or "URGENT SEARCH" button to select the playback modes to begin playback. Or double click the date/time to begin playback. During the single channel playback mode, turn the middle button of mouse to select other cameras displaying on the screen.

To zoom in images can only be operated by mouse. During the playback mode, select the desired single camera and the single channel is displaying on the screen. Click on the "Zoom" button to enable ZOOM function. Keep pressing the left mouse button and drag it to select zoom area. After release the left mouse button it will zoom in the selected image. Right click the mouse to return back the normal image. Double click the mouse to exit ZOOM function.

2.8 Time Searching Playback

1. Press "SEARCH" button on the front panel to display SEARCH MENU during the live display mode.
2. Press "LEFT" or "RIGHT" button to select TIME SEARCH playback mode and press "ENTER" button to enter TIME SEARCH menu.
3. Press "UP", "DOWN", "LEFT" and "RIGHT" buttons to select the beginning date/time for playback.
4. Press "ENTER" button to begin TIME SEACHING playback.
● **Mouse**
1) Click the mouse on the MENU icon on the bottom status bar to display

POPUP MENU during the live display mode. Then click on the SEARCH button to display SEARCH MENU. Click on the "TIME SEARCH" button to enter TIME SEARCH menu or double click the date/time to begin TIME SEACHING playback.

2)   At the TIME SEARCH menu, move the mouse and turn the middle button of mouse to select the beginning date/time for playback.

3)   Then click on the top right "O" (OK) button to begin TIME SEACHING playback.
2.9   Event Searching Playback

1. Press "SEARCH" button on the front panel to display SEARCH MENU during the live display mode.

2. Press "LEFT" or "RIGHT" button to select EVENT SEARCH playback mode and press "ENTER" button to enter EVENT SEARCH menu.

3. Press "UP", "DOWN", "LEFT" and "RIGHT" buttons to select the event beginning date/time for playback.

4. Press "ENTER" button to begin EVENT SEACHING playback. The playback is only for motion and schedule recording mode.

● Mouse

1. Click the mouse on the MENU icon on the bottom status bar to display POPUP MENU during the live display mode. Then click on the SEARCH button to display SEARCH MENU. Click on the "EVENT SEARCH" button to enter EVENT SEARCH menu.
