Insert transitions in a slide show

In this tutorial you can follow the step by step procedure for inserting transitions into a Nero Vision slide show.

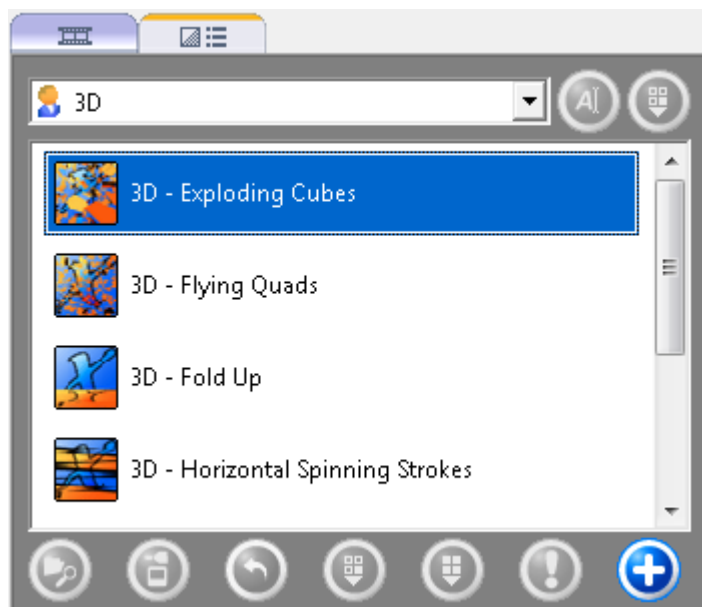

The following requirements have to be fulfilled:

- You have launched Nero Vision.
- You have gone into the **Slide show** screen to open a slide show for editing.

To insert transitions, proceed as follows:

1. If you want to assign the same transition to all pictures:

1. Click the film strip until it is highlighted in blue.
2. Click the  tab in the media area.

Transitions tab

3. Select your required transition group in the selection menu.
 - The transition types of the selected group are displayed in a small preview along with their names.
4. Highlight the required transition and click the  button.

Identification of transitions

An image with transition is identified in the contents area by the colorful  icon of the respective transition. Images without a transition are indicated in the contents area by a gray icon.

2. If you want to insert different transitions in the pictures:

1. Highlight the picture to which you would like to assign the transition effect.

2. Click the  tab in the media area.
 3. Select your required transition group in the selection menu.
 - The transition types of the selected group are displayed in a small preview along with their names.
 4. Highlight the required transition and click the  button.
 - The transition is inserted before the selected image in the contents area.
- You have inserted transitions.
