Chapter 4 : HyperMedia Introduction

HyperMedia is a multi-function application including watching TV, listening to the FM radio, editing film and burning DVD function. When using it, there are two main accesses to choose, one is "Input Source" for selecting TV & radio function and another is "Extra application" for film function. Picture below is an example of how the interface looks like and a short description of each function.

- Note:
- 1. When you click "Input Source" button, you can choose different signal sources, such as Analg TV(ATV), Digital TV(DTV) and FM radio, however, it must depend on your TV tuner device.
- 2. For more detailed descriptions, please refer to HyperMedia user manual.
